

Official U.S. Air Force Academy Imagery

Effective 15 April, 2015

The graphics below are now the only approved imagery to be used on any official correspondence or on any products produced which may require the U.S. Air Force Academy Coat of Arms, Emblem or Shield. No other versions should be used. Please note that there are two versions of the USAFA Coat of Arms. The preferred version has white stars around the shield and eagle, the alternate version has white stars outlined in gray/silver and is for use on a white background so the stars will be visible.

The second page of this document shows the exact color specifications for instances where the images may be fabricated or reproduced on other products.

Official USAFA Coat of Arms

Note: Gray background is NOT a part of the Official Coat of Arms. It is included here to show the white stars.

Official USAFA Coat of Arms - Alternate

Official USAFA Emblem

Official USAFA Shield
